

IONNYK

A magical piece of art

Art by Juan Kiti

IONNYK is the world's first e-paper digital art frame, containing millions of tiny ink capsules.

IONNYK values the integrity of art photography. That's why all of our art photos have the crispness and high-resolution quality as paper ink photography. The only difference? We don't use paper ink. We use e-paper technology containing millions of tiny ink capsules that mimic the appearance of ordinary ink on paper.

This means that our e-paper screens reflect light from the environment towards the viewer's eyes, just like with traditional paper. And that our frames only consume power when the picture on it is changing. Ever wondered what makes IONNYK frames so different from all the other high-definition screens? This is it.

## Lifelike art photography

Experience art photography as it should be, without a backlight screen.

Digital ink is your guarantee to high visual quality of art photography that feels like paper, no matter what light conditions.

Only use the technology when you need it (up to 1 year autonomy). And get delighted by what you see.

## Wirelessly connected

Say goodbye to annoying power cords and hang your frame wherever you want. Simple and easy.

Do you prefer horizontal or vertical orientation? It's always spot on and accurate. We don't settle for less. The result? Eye candy elegance guaranteed.

Any time. Any place.

## Smart experience

Sit back and slide through your favorite themes, collections and stories.

A tree at noon and a landscape at diner? IONNYK does it, whenever you want and at your pace. Sometimes even unexpectedly. What you see is a paper picture, what you get is magic.

Just try it, you'll like it.
